RMIT student (city campus) looking for work placement within the melbourne or international tech industry, currently towards the work integrated learning (WIL) subject within the Software Engineering bachelors.

A fast learner that can adapt to the ever changing tech industry and is seeking employment where technical growth is possible.

Education

Royal Melbourne Institute of Technology

Bachelor of Computer Science - BP094 **2017 - 2017**

- GPA of 4.0 (out of 4.0) before credit transfer

Bachelor of Software Engineering - BP096 **2017 - 2020**

- GPA of 3.3 (out of 4.0)

Academic transcript as of 23rd January 2018 [here](#).

Experience

CSIT Mentoring program

2017

Mentors are student volunteers who are knowledgeable across a broad range of computer science subjects and are quite flexible in handling groups. Mentors are required to understand **Java** and **C** for programming assignments as well as **HTML**, **CSS**, **JavaScript** and **PHP**.

Personal projects, [find it on my GitHub](#)

2016 - Ongoing

In my spare time, I enjoying working on 'passion projects'. I built an Image scraper via **python**, an invoice generator via **Visual Basic** for a small business, an arduino robot with **C++** and a genetic algorithm with **Processing**. I am experienced with **Linux** as it is useful for working with some projects.

Ohm Power - Developer & Marketing Intern

2017 - Ongoing

Ohm Power is an independent, third party, energy price comparison platform based in melbourne. Assisted the marketing department to **generating leads** and worked on the new **Keystone JS CMS system** for the website overhaul.

Past professional experience

Myer Southland - Sales assistant

2015 - 2017

- Achieved upselling of additional products and insurance with customers.
 - Reached hourly sales quota of \$500 within the electrical department.
 - Ensured cash, credit cards and gift cards are properly handled over the point of sale (POS)
-
